

# ADVANCED NETWORK

Our network provides a modern, flexible, and scalable infrastructure spanning multiple data centers nationwide. Built with the latest Cisco Technology, the LightEdge network provides automatic failover capabilities and built-in redundancy, ensuring applications and services always remain available. Together, our networking experts and core technology can quickly adapt to changing business needs and requirements.

## FLEXIBLE PRIVATE BACKBONE

- ▲ Architected a robust, reliable, and secure private MPLS backbone between all facilities
- ▲ Multiple paths in/out of each geography with diverse paths to mitigate the risk associated with the carrier hotels
- ▲ Provide multiple service types including Layer 2 and Layer 3 services providing more control and flexibility for your DR needs

## ALWAYS ON BLENDED INTERNET

- ▲ We blend 10+ carriers nationwide over a redundant MPLS backbone
- ▲ Peer with multiple internet exchange partners to reduce network hops, latency, and congestion

## EDGE NETWORKING

- ▲ Integrates with multiple network service providers to provide dedicated, private, and secure access to public cloud providers and SaaS services
- ▲ Our robust ecosystem of partners can reduce the complexity involved with multi-cloud and edge networking. This includes remote office and wide area network connections
