

Bare Metal Cloud

Enhance deployment with speed, flexibility, and cost advantages

Lightedge Bare Metal provides you with physically isolated, high-performance servers, storage, and network solutions, all uniquely configured to meet your specific needs. With this dedication, your business will gain added security, compliance, and complete control.

As your business grows and changes, we enable you to effortlessly establish a hybrid environment tailored to your evolving needs, placing your success at the forefront of our priorities.

✓ Power

Maximize the advantages for your needs: Memory optimization, Heavy I/O performance, or Maximum Compute power.

✓ Hybrid Enabled

Seamlessly deploy, expand, and integrate additional clouds and services to meet your future requirements effortlessly.

✓ Compliance

Leverage dedicated hardware for HIPAA and PCI DSS compliance to ensure your data's security and regulatory needs are met.

✓ Managed

Experience ISO 20000-1 and 27001 validated centers with ITIL-aligned operations for your confidence and convenience.

✓ Monitored

Access superior data insights, intuitive dashboards, timely alerts, top servers, OS, RAM, network, and storage.

Your business, your goals

Empower your business by utilizing dedicated servers to achieve peak performance, tailor-made customization, and unmatched flexibility. Choose Lightedge Bare Metal Cloud if you:

- ✓ Strive for exceptional performance and workload efficiency.
- ✓ Require swift scalability and deployment.
- ✓ Seek to minimize capital expenditures for future equipment upgrades.
- ✓ Aim to allocate your skilled IT staff to strategic tasks, not hardware management.
- ✓ Demand the highest level of HIPAA or PCI DSS security.
- ✓ Value a reference architecture that remains relevant over time.

Connect with us

When you join with Lightedge, every challenge you face in the digital realm becomes more than a mere problem to solve.

Change is inevitable, but it's the gateway to more opportunities than you ever thought possible.
